

# Smartflower Monitor

Control your Smartflower from the comfort of your phone.

Control your Smartflower, monitor your energy production, and check on the status of your Smartflower units all from the comfort of your phone with our new **Smartflower Monitor** mobile app! Some features will require a working internet connection (Wi-Fi access, Cell-Enabled communication, or Ethernet options available).

## Monitor Your Energy.

Get both live and long-term energy production statistics charted on your mobile device.

## Your Remote Control.

Choose between the Open, Close, Cleaning, and Canopy commands for your Smartflower, all from your device.

## Always Up to Date.

Cloud-based software updates ensure that you get the most up-to-date software as soon as it's available.

## Here to Support You.

Our Smartflower support team actively monitors your unit and resolves any potential issues before you even realize it.
